Technical Data Sheet

Octowax 1500 (E)

CHEMICAL DESCRIPTION: Blend of paraffin and microcrystalline wax

PRODUCT DESCRIPTION:

Octowax 1500 (E) is an emulsion of blended paraffin and microcrystalline waxes, and is used to hydrophobise latex coatings.

Especially in combination with non-staining antioxidants Octowax 1500 (E) is used in latex rubber as an antioxidant. The wax "blooms" during the cure process from the emulsion to the rubber surface, providing a barrier against ozone attack.

Octowax 1500 (E) is designed to be added directly to latex compounds. Usage levels are generally 1.0 - 5.0 parts based on the dry weight of the latex.

There are no volatile organic compounds in Octowax 1500 (E).

TYPICAL PROPERTIES:

Solids, %:	49.0 – 51.0
pH:	7.2 – 8.2
Density, g/ml:	0.95 – 1.05

STORAGE AND HANDLING:

Containers should be kept tightly closed. Protect from freezing. Contents should be stirred using mechanical agitation prior to use.

PACKAGING:

Available in bulk, IBC and drums

SAFETY:

Please refer to Safety Data Sheet
